Education

University of California, Berkeley — **Berkeley, CA**
Ph.D. in Computer Science, EECS Department, NetSys Lab — *Incoming Fall 2026*

- Co-advised by Prof. Sylvia Ratnasamy and Prof. Rishabh Iyer

University of California, Santa Barbara — **Santa Barbara, CA**
B.S. in Computer Science, College of Creative Studies; Minors in Statistics and Mathematics — *Sept 2022 – June 2026*

- GPA: 4.0/4.0 (73% A+'s)
- Graduate coursework: Information Theory, Time Series Analysis, Machine Learning for Networks

Awards & Honors

- **CRA Outstanding Undergraduate Researcher Award**, Honorable Mention — 2026
- **UCSB Computer Science Outstanding Undergraduate Researcher** (sole department-wide recipient) — 2025
- **CCS Travelling Undergraduate Research Fellowship (TURF)** — 2025
- **ACM CHI Student Game Competition, 1st Place** (one team selected per year) — 2021

Publications

- **Z. Weissman**, J. Liu, and E. Belding. "The Impact of GEO Satellite Latency on Twitch Live Streams." *34th International Conference on Computer Communications and Networks (ICCCN)*, Tokyo, Japan, August 2025.
- A. Taheri, **Z. Weissman**, and M. Sra. "Design and Evaluation of a Hands-Free Video Game Controller for Individuals With Motor Impairments." *Frontiers in Computer Science*, vol. 3, 2021.
- A. Taheri and **Z. Weissman**. "Designing a First Person Shooter Game for Quadriplegics." *Extended Abstracts of the 2021 CHI Conference on Human Factors in Computing Systems (CHI EA '21)*, Article 493, 1–6.
- A. Taheri, **Z. Weissman**, and M. Sra. "Exploratory Design of a Hands-free Video Game Controller for a Quadriplegic Individual." *Augmented Humans International Conference 2021 (AHs '21)*, 131–140.

Research Experience

MOMENT Lab, UC Santa Barbara — **Santa Barbara, CA**
Undergraduate Researcher, advised by Prof. Elizabeth Belding — *Dec 2023 – June 2025*

- Led first-author study of Twitch livestreaming over GEO satellite networks; deployed measurement infrastructure on a production satellite link, collecting 500 streams across 25 categories.
- Reverse-engineered Twitch's chunk scheduling via HTTP trace analysis and validated findings on a controlled emulation testbed; modeled rebuffering cascades, showing median rebuffering tripled on satellite vs. terrestrial. Published at IEEE ICCCN 2025.

Systems and Networking Lab (SNL), UC Santa Barbara — **Santa Barbara, CA**
Undergraduate Researcher, advised by Prof. Arpit Gupta — *Sep 2024 – June 2025*

- Collaborated with Google M-Lab on network congestion detection: replaced an underperforming deep model with an interpretable BBR-grounded statistical model, and built sequential-hypothesis-testing early-stopping plus domain-adapted ML to infer connection medium and bandwidth from passive video metrics.

Industry Experience

Clockwork Systems — **Palo Alto, CA**
Software Engineering Intern, AI/ML Infrastructure — *June – Sept 2025*

- Built distributed monitoring pipelines for Clockwork's Fleet Monitoring product to isolate GPU slowdowns, network jitter, and firmware faults in large-scale ML training.
- Implemented C++/Rust/CUDA instrumentation to separate training noise from systematic faults; quantified the impact of straggling GPUs across distributed training contexts.

Amazon Web Services, Annapurna Labs — **Cupertino, CA**
Software Engineering Intern, Networking Tools & Solutions — *June – Sept 2024*

- Built tools to characterize network behavior during firmware updates, modeling packet loss, latency, and throughput across data center hardware to harden AWS's SRD protocol.

EQTYLab — **Remote**
Software Engineering Intern, Frontend & Algorithms — *June – Sept 2023*

- Designed and built a graph visualization tool for data lineage.

Teaching Experience

Undergraduate Learning Assistant, CS 176A: Computer Communication Networks — **Santa Barbara, CA**
UCSB Department of Computer Science — *W25, F25*
