EDUCATION

University of California, Berkeley

Ph.D. in Computer Science, EECS Department, NetSys Lab

Berkeley, CA

August 2026 – May 2031 (expected)

- Co-advised by Prof. Sylvia Ratnasamy and Prof. Rishabh Iyer

University of California, Santa Barbara

B.S. in Computer Science, College of Creative Studies; Minors in Statistics and Mathematics

Santa Barbara, CA

Sept 2022 – June 2026

- GPA: 4.0/4.0 (Graduated with highest honors)
- Graduate coursework: Information Theory, Time Series Analysis, Machine Learning for Networks
- Conducted network measurement research in the [MOMENT Lab](#), advised by Prof. Elizabeth Belding, on the impact of GEO satellite latency on Twitch livestreaming (published at IEEE ICCCN 2025).
- Conducted research in the [Systems and Networking Lab \(SNL\)](#), advised by Prof. Arpit Gupta, on network congestion detection in collaboration with Google M-Lab.

INDUSTRY EMPLOYMENT

BitRipple

Research Engineer

Berkeley, CA

June – Aug 2026

- Designed and implemented GPU-accelerated RaptorQ/LT erasure codes on NVIDIA GH200, including a segmented parallel evaluation scheme for the decoding pipeline.
- Characterized decode throughput and symbol-loss tradeoffs to inform coding-aware transport for distributed ML training.

Clockwork Systems

Software Engineering Intern, AI/ML Infrastructure

Palo Alto, CA

June – Sept 2025

- Built distributed monitoring pipelines for Clockwork's Fleet Monitoring product to isolate GPU slowdowns, network jitter, and firmware faults in large-scale ML training.
- Implemented C++/Rust/CUDA instrumentation to separate training noise from systematic faults; quantified the impact of straggling GPUs across distributed training contexts.

Amazon Web Services, Annapurna Labs

Software Engineering Intern, Networking Tools & Solutions

Cupertino, CA

June – Sept 2024

- Built tools to characterize network behavior during firmware updates, modeling packet loss, latency, and throughput across data center hardware to harden AWS's SRD protocol.

EQTYLab

Software Engineering Intern, Frontend & Algorithms

Remote

June – Sept 2023

- Designed and built a graph visualization tool for data lineage.

AWARDS & HONORS

- CRA Outstanding Undergraduate Researcher Award, Honorable Mention 2026
- UCSB Computer Science Outstanding Undergraduate Researcher (sole department-wide recipient) 2025
- CCS Travelling Undergraduate Research Fellowship (TURF) 2025
- ACM CHI Student Game Competition, 1st Place (one team selected per year) 2021

TEACHING EXPERIENCE

Undergraduate Learning Assistant, CS 176A: Computer Communication Networks

UCSB Department of Computer Science

Santa Barbara, CA

W25, F25
